4. The following is an examiner's statement of reasons for allowance: These reasons for allowance should not be interpreted to imply that limitations not specifically mentioned are immaterial to patentability. The prior art of record fails to disclose or reasonably suggest a device/method as claimed, including an association table storing a predetermined event, a plurality of different control instructions and a plurality of different operation instructions corresponding to the event, wherein an event is detected based on the association table and the plurality of different control and/or operation instructions are transmitted to a plurality of chat device destinations (such that not all chat participants receive the same instructions) where the instructions are used to operate a image/physical representations of the chat participants that are linked to/installed in the chat device destinations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
